Class Teams

My eCoach offers Class Teams that grant students access to My eCoach and their team for the school year. Class Teams can:

- participate in private discussions
- create and publish projects and websites
- clone templates or start from scratch
- co-author projects and surveys
- receive coaching from their eTeacher
- blog safely with their class team
- use a secure messaging system
- track events with the calendar
- properly cite sources
- add class members as friends
- access thousands of free resources

With Class Teams, students have full access to all My eCoach features for the school year. Class Teams are only $100 per school year for up to 40 students. This option is open for teachers who understand and frequently use the tools and features in My eCoach.

To help you set up and manage your class team, we offer an affordable eTeacher online course. Contact us to receive more information or to sign up your classroom for the next school year.

Safe and Secure

Sustainable and Cost-effective

Student Access from Anywhere
