Common Name-Thistle sage  
Scientific Name-Salvia carduacea  
Plants Range-South-western N. America - California  
Annual/Perennial-The Thistle Sage is perennial  
Description-The Thistle sage is a mix of light blue and lavender. It has spine-tipped leaves and dense white woolly hairs. It is usually found in open grassy areas.  
Water Use-The Thistle sage only uses a little bit of water a day  
Pests-Some of the pests that like the Thistle Sage are bees, flies, and lady bugs  
Common Name: Cheese Weed
Scientific Name: Malva parviflora
Plants Range: Hawaii and other tropical islands
Annual/Perennial: Annual

Description: It grows up to 2.3 mm high and 3 mm wide. Its native range is the Mediterranean region through Asia Minor to India.

Water Use: The Cheese Weed Needs a lot of water if it grows in Hawaii because it is hot in Hawaii.

Pests: Although we have seen no reports of toxicity for this species, when grown on nitrogen rich soils the leaves of some species tend to concentrate high levels of nitrates in their leaves. The leaves are perfectly wholesome at all other times.
